SUMMARY

I am a Computer Science graduate focusing on cybersecurity, seeking a full-time opportunity in the cybersecurity area to apply my skills in security, networking, engineering and programming to tackle real-world challenges. Interned at Khalifa Abdulrahman Alghosaibi Investment Company. I hold the *Security+* certification and *eJPTv2* and participated in the *KAUST Academy x NCA* “Cybersecurity Specialization” Program to expand my knowledge and hands-on expertise in security practices, and currently pursuing *eCPPTv3* certificate.

EXPERIENCE

Cybersecurity Internship – Khalifa Abdulrahman Alghosaibi Investment Company	June 2026 – Aug 2026
- Built EventEyes, a Windows security assessment and log-analysis framework that automated evidence validation and reporting, identifying six validated security findings when deployed on a Windows endpoint. Later evolved into Verifact, a public AI-agent skill for Codex and Claude Code. - Performed authorized penetration testing on a Windows endpoint, exploiting a CISA KEV (CVSS 8.8) and capturing NTLMv2 credential material using Kali Linux and Metasploit. - Conducted an external attack surface assessment with CTM360 across DNS, SSL/TLS, exposed services, web security, and corporate accounts appearing in breach datasets. Delivered prioritized remediation recommendations to the Group IT Manager. - Built KAI’s cybersecurity risk register from company asset data and completed security architecture and hardening exercises covering network segmentation, firewall policy, and CIS/Microsoft security baselines. - Presented security findings, remediation priorities, and business risk to management while resolving approximately 50 IT support tickets through iTop.	
Secretary and Front desk – Tameem Alhusennan Law Firm	Dec 2019 – Mar 2020

EDUCATION

Bachelor of Computer Science – Imam Abdulrahman Bin Faisal University	Aug 2021 – June 2026
GPA: 4.4/5 – Second Honours Degree	

VOLUNTEERING

Admin and Data Entry – Computer Science and Information Technology Club at IAU	Jan 2024 – Aug 2025
Finance Lead – Google Developer Student Club at IAU	Jan 2024 – June 2024
Administrative Assistant – Cybersecurity Club at IAU	Aug 2023 – Aug 2025
Crowd Organizer – Ithra by Saudi Aramco	Jan 2022 – Present
Croud Organizer during Hajj Season (1445 AH) – Saudi Arabian Boy Scouts Association	June 2024

CERTIFICATIONS

eJPTv2 – INE	Cybersecurity Incident Response Analysis Virtual Work Experience at STC – Misk
Security+ – CompTIA	McKinsey Forward Program – McKinsey & Company

PROJECTS

Threat Sense AI-Assisted Malware Analysis & Incident Response Automation – Graduation Project	
End-to-end malware analysis and incident response system that automatically generates structured Incident Response Action Plan, with phase-ordered remediation steps for every analyzed malware sample. Combines static analysis, ML classification, and live VirusTotal intelligence through a 35-rule engine mapped to MITRE ATT&CK and MITRE D3FEND, with every recommendation traced to NIST, CISA, and NCA advisory standards, reducing security analysts time to analyze malware samples from 8 hours to 45 minutes.	
Stale Multi-Agent Auditor for University Courses – Claude Code Hackathon by Anthropic	
- Curriculum auditor that reviews computer science course material for outdated, incorrect, deprecated, or insecure technical content. - It verifies findings against primary sources and provides corrected and current alternatives. - Maps course content to skills expected in modern technical roles, helping identify gaps between academic material and real-world practice.	

SKILLS

Penetration Testing & Offensive Security: Network & Web Application Penetration Testing (Burp Suite, Nmap), Active Directory Enumeration, Vulnerability Validation & Exploitation (Metasploit, Kali Linux), Traffic & Protocol Analysis (Wireshark, TCP/IP)

Security Operations & Threat Analysis: SIEM & Log Analysis (Splunk), Windows Event Log Analysis & Threat Triage, Vulnerability Assessment, External Attack Surface Management (CTM360)

Engineering & Automation: Python (Security Automation), SQL, Java, AI-Assisted Security Tooling (Claude Code, Codex), Custom Security Tool Development

Security Architecture & Frameworks: Network Segmentation & Firewall Policy, MITRE ATT&CK / D3FEND, NIST SP 800-61 / 800-30, NCA Controls

LANGUAGES

- **Arabic** – Native
- **English** – Professional working proficiency
